DETAILED ACTION

Election/Restrictions

- 1. The previous restriction requirement mailed on 9/16/05 has been vacated because of a clarity issue. Applicant's representative, Mr. Pollack, phoned the examiner on 10/25/05 to ask for a clarification of the restriction requirement and for a new office action clarifying the restriction. The following adds section 6 that clarifies the office's position on the restriction requirement.
- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 18-20, drawn to an article of jewelry, classified in class 63, subclass 4.
 - II. Claims 9-17, drawn to a method of making an article of jewelry, classified in class 59, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the article of jewelry can be made by forming crosspieces with hooked ends and hooking the ends to respective chain links and then deforming the ends to secure the crosspieces to the chain link.

Application/Control Number: 10/795,937

Art Unit: 3677

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 6. Upon election of either Group I or II, applicant must also elect a single species to be examined for that group of claims.
- 7. This application contains claims directed to the following patentably distinct species of the claimed invention: species 1, figure 1, species 2, figure 2, species 3, figures 3 and 4, species 4, figure 5, species 5, figure 6, species 6, figure 7, species 7, figure 8, species 8, figure 9, species 9, figure 10, species 10, figure 11.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Application/Control Number: 10/795,937

Art Unit: 3677 -

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention:

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack W. Lavinder whose telephone number is 571-272-7119. The examiner can normally be reached on Mon-Friday, 9-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Swann can be reached on 571-272-7075. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
